## Rename Operations add-in (PoC)

1. Install the Rename Operation add-in.
- [Fusion 360 Help | How to install an add-in or script in Fusion 360 | Autodesk](#)

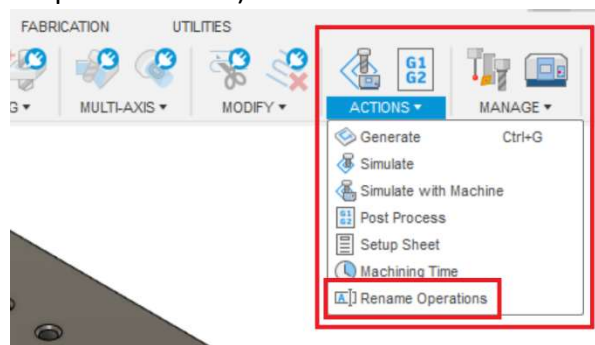

2. Set the add-in to "Run on startup" or "Run".

3. Activate the Setup with the operations you wish to rename.

4. From the Milling tab select the Action tab and select 'Rename Operations' (or in the drop-down menu)

5. Enter your user formatted syntax.

   a. Prefix
   b. Start Number (default = 1)
   c. Increment (default = 1)
   d. Add Operation strategy (default = True)
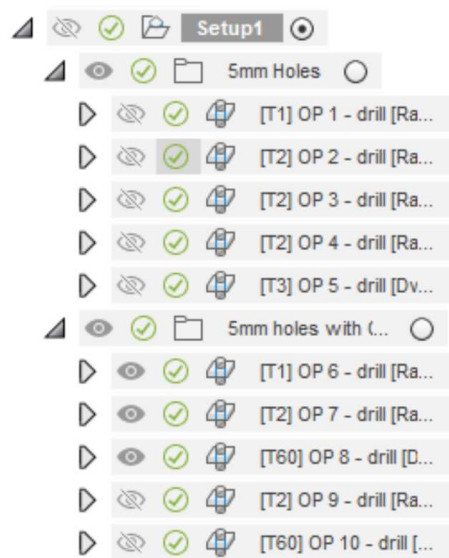

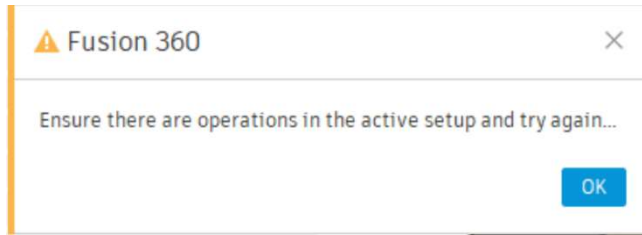

True

False

6. Then, Click Ok

7. A progress dialog window will be displayed.

8. All operations in the selected setup, including operations within any folders in the setup will be renamed.

9. If a selected Setup contains no operations, a pop-up message will appear informing the user to review the selection.

10. If a folder is selected within a Setup, a pop-up message will appear informing the user to review the selection.
